ResourSEAs s.r.l.
Edificio 16, Viale delle Scienze
90128 Palermo (Italy)
P.Iva 06596440823

JOB OPENING

ResourSEAs SrL is recruiting an Innovation Manager. This is a full-time, permanent position, with a competitive salary that gives the opportunity to the right candidate to lead the company's activities during an exciting period of growth.

Annual gross salary will be in the range of 30.000-40.000€, depending on qualifications and experience.

Provisional starting date: 1st of June 2020

Location: The selected candidate will be working from the ResourSEAs offices in Palermo, Sicily (Italy). Some national and international travel will be required.

Company profile: ResourSEAs is a young innovative start-up company and recipient of various awards, including the prestigious National Prize for Innovation 2016. The core business of ResourSEAs is the development and application of novel technologies for the valorization of natural and industrial brines towards the sustainable production of fresh water, minerals and energy (for more information check http://resourseas.com/).

Job Overview: The Innovation Manager will build and manage a small team of people, leading the activities of ResourSEAs within international research projects, in which the ResourSEAs technology will be implemented on a prototype scale. The main focus will be on the production of magnesium compounds from waste brines. The Innovation Manager will also establish relationships with end-users, ensuring that the final products meet their requirements and will develop a strategic plan towards building a scaled-up production plant and providing the products to the market.

Responsibilities and Duties

The Innovation Manager will have a varied role, adapting to day-to-day requirements. Some of the responsibilities include but are not limited to:

- project management;
- recruitment and management of team members;
- design, commissioning and testing of pilot units for reactive crystallisation;
- drafting patent applications;
- building and maintaining relationships with customers and suppliers;
- participating at events and trade fairs;

- fund raising;
- support of administrative activities and establishment of standard procedures associated with managing the team and the office.

Qualifications:

Candidates shall hold a first-class master's degree in one of the following sectors of Engineering:

- Chemical Engineering;
- Environmental Engineering;
- Mechanical Engineering;

A PhD in any engineering-related field is preferred.

Work Experience:

At least 2-3 year's previous work experience is required in the field of chemical and process engineering, design & prototyping activities or R&D in new technologies and international collaborations.

Experience in managing a team is preferred.

Language requirements:

The candidates should be fluent in English (both spoken and written)

Proficiency in Italian is preferred.

Other requirements:

Valid EU work permit

Application Process:

Candidates are invited to submit their CV and motivation letter to the following email address, specifying "job opening" in the subject line:
